Module :3

- FTP Connection
- Conditions
 - Decision
 - Route
- Business Rules
- Branch
- Set Dynamic Document Property
- Set Dynamic Process Property
- Set Process Property

Module :4

Deploy tab

Atom Management tab

Process Reporting tab

Process Triggering

Scheduling

Module :5

Database Connection

Simple Integration – Database Retrieval

Salesforce Connection

Simple Integration – Salesforce Retrieval

Module :6

Salesforce to Database Insert

Salesforce to Database Update

Module :7

Database to Salesforce Insert

Database to Salesforce Update

Database to Salesforce Split and Combine

Module :8

Database to Salesforce Upsert

Connector Call

Cross Reference Table

Module :9

Exception Handling

Exception Sub process

Module :10

Main Process

Process Call (Sub Process)

Components - Find Changes, Cleanse

Module :11

Webservice SOAP client

HTTP Client

Module :12

Simple Web service Server

Salesforce Web service Server

Module :13

JMS Integration

Module :14

SuccessFactors Integration

Module :15

User Management

Roles and Permissions

Email Alerts setup

Licensing

Module :16

Mappings

Map Functions

Function Order specific to EDI

Cache Implementation

Add to Cache

Load from Cache

Deploy and Updeploy process

Scheduling the process

Versioning

Module :17

Administration

Execute process.
